Portfolio Manager(s)	Management Team

Morningstar® Style Box™ As of 09/30/2023

<BBB

The horizontal axis represents the Fund's sensitivity to interest rates as measured by the average effective duration: Ltd <=3.5 Yrs; Mod > 3.5 Yrs and <=6 Yrs; Ext > 6 Yrs

Description / Objective

This Custom Plan Investment Option (the "Fund") invests wholly in the underlying collective investment trust fund, BlackRock US Bond Index (the "C.I.T."). The C.I.T. is an "index fund" that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of its Underlying Index (defined below).

The C.I.T. is a collective investment trust maintained and managed by BlackRock Institutional Trust Company, N.A. ("BTC"). The C.I.T. shall be invested and reinvested primarily in a portfolio of debt securities with the objective of approximating as closely as practicable the total rate of return of the market for debt securities as defined by the Bloomberg U.S. Aggregate Bond Index (the "Underlying Index"). BTC uses a "passive" or indexing approach to try to achieve the C.I.T.'s investment objective. Unlike many C.I.T.s, the C.I.T. does not try to outperform the index it seeks to track and does not seek temporary defensive positions when markets decline or appear overvalued.

BTC uses a representative sampling indexing strategy to manage the C.I.T.. "Representative sampling" is an indexing strategy that involves investing in a representative sample of securities that collectively has an investment profile similar to the Underlying Index. The securities selected are expected to have, in the aggregate, investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the Underlying Index. The C.I.T. may or may not hold all of the securities that are included in the Underlying Index.

When deemed appropriate by BTC and unless otherwise provided in the C.I.T.'s investment strategies, BTC may invest all or any portion of the C.I.T. in one or more futures contracts, forward contracts or other similar assets for the purpose of acting as a temporary substitute for investment in securities.

The C.I.T. may invest through one or a series of collective investment trusts maintained and managed by BTC. In the event of a conflict between this summary description of the C.I.T.'s investment objective and principal investment strategies and the Trust Document under which the C.I.T. was established, the Trust Document will govern. For more information related to the C.I.T., please see the C.I.T.'s Trust Document, Profile and most recent audited financial statements.

There is no assurance the objectives will be met.

Fixed income investment (bond) funds are subject to interest rate risk; their value will decline as interest rates rise. Fund shares are not guaranteed by the U.S. Government.

C.I.T. Top Five Holdings	As of 09/30/2023	C.I.T. Quality Distribution	As of 09/30/2023

Fund Structure. Your retirement plan makes available certain plan investments structured as "fund of funds" (investments that invest in one or more underlying funds). These investments are neither mutual funds nor separate accounts offered by Prudential Retirement Insurance and Annuity Company ("PRIAC"). Rather, PRIAC acts solely as a record keeper in providing administrative and valuation services in connection with these plan investments. Management of these plan investments is the sole responsibility of your plan sponsor and/or a third party whom the plan sponsor has hired to provide investment management services.

Miscellaneous. Frequent exchanging of investment options may harm long-term investors. Policies may be in effect at the plan or the investment level to detect and deter exchanges that may be abusive. Such policies may require us to modify, restrict, suspend or terminate purchase or exchange privileges and impose redemption fees. Please refer to the prospectus, if available for the investment, for information on these potential restrictions and any applicable redemption fees. Otherwise, please contact your Representative. Indices are unmanaged and cannot be invested in directly. See User Guide for index definitions. The index shown, if applicable, in the Characteristics chart refers to the Primary Index.

Prudential Retirement's Role. This fund is not part of Prudential Retirement's Manager of Managers Program and Prudential Retirement does not assume any responsibility for the plan's decision to invest in the funds, to monitor their performance or to provide information regarding the funds. Each of those is the sole responsibility of the plan. To the extent Prudential Retirement provides such information, it makes no warranty as to the accuracy of such information and makes no undertaking to continue to provide such information unless Prudential Retirement agrees to continue to provide such information in writing.

The Net Expense Ratio is rounded to the nearest thousandth percent.

Fees Reflected in Performance. All performance results are net of the total expense ratio for this Fund of 0.038%.

Performance Risks. Before investing, investors should carefully consider the investment objectives, risks, charges and expenses of this Fund and other plan investment options. The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. For performance data current to the most recent month end, please call 888-71A-LOHA. It is possible to lose money investing in securities. Past performance is not indicative of future performance and short periods of performance may be particularly unrepresentative of long-term performance.

Additional Information for the Total Annual Operating Expense. The Total Annual Operating Expense ("TAOE") ratio noted above reflects a management fee and administrative costs. The administrative costs are capped at one (1) basis point (0.01%) per year. There may be other fees and expenses not reflected in the TAOE ratio noted above that bear on the value of the investment. TAOE is based on estimated amounts for the current fiscal year.

Morningstar Rating™ (Collective Investment Trust), (if available)

The Morningstar Rating™ is provided for those collective investment trusts (CITs) with at least a three-year history. Ratings are based on the CIT's Morningstar Risk-Adjusted Return measure which accounts for variation in monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. Morningstar compares each CIT's risk-adjusted return against the breakpoints for the exchange-traded fund and open-end mutual fund universe for that category. The top 10% of exchange-traded and open-end mutual funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The CIT's Morningstar Rating does not affect the retail fund data published by Morningstar.

Possibility of Contract Charges. Your retirement plan may have agreed to contract charges. If so, these would reduce the performance (and possibly the Morningstar ratings) shown above. Any contract charges are included in the expense ratio shown in your statement and in the performance shown in your statement. The Fund fees and contract charges compensate us for the distribution and servicing associated with your plan. Other plan investment options may generate more or less revenue for us than the fees associated with this Fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other plans investing in the Fund may have lower fees, but these are not available to your plan in order to compensate us for distribution and plan servicing.

For more information, go to www.prudential.com/islandsavings or call toll-free 888-71A-LOHA. Data presented is as of the period specified for this report, unless otherwise specified within a table heading. Data and expense ratios presented are the most current made available at the time of production. For mutual funds, the fund company may have more recent data available on its website. Price corrections that impact performance data may occur after production of this material.

Average Maturity For a single bond, it is a measure of maturity that takes into account the possibility that a bond might be called back to the issuer.

For a portfolio of bonds, average effective maturity is the weighted average of the maturities of the underlying bonds. The measure is computed by weighing each bond's maturity by its market value with respect to the portfolio and the likelihood of any of the bonds being called. In a pool of mortgages, this would also account for the likelihood of prepayments on the mortgages.

Effective Duration Calculated for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change. This measures the responsiveness of a bond's price to interest rate changes, and illustrates the fact that the embedded option will also affect the bond's price.

Net Assets Balance data presented is the most current data available at the time of receipt, however some information may be presented on a lag. The data is deemed reliable but the accuracy cannot be guaranteed. All balances are unaudited.

Net Expense Ratio The Total Net Expense Ratio represents fee charged against fund assets after adjustment for fee waivers if applicable. The Net Expense Ratio will equal the Gross Expense Ratio when no fee waivers are in place. Expense data is typically quoted with two decimal places; however, three decimal places will be displayed when values are available.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Portfolio Turnover (%) This is a measure of the fund's trading activity, which is computed by taking the lesser of purchases or sales (excluding all securities with maturities of less than one year) and dividing by average monthly net assets. A low turnover figure (20% to 30%) would indicate a buy-and-hold strategy. High turnover (more than 100%) would indicate an investment strategy involving considerable buying and selling of securities.
