Description / Objective

The investment seeks to maximize total return while realizing a market level of income consistent with preserving principal and liquidity. To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in U.S. dollar and non-U.S. dollar-denominated fixed-income securities of governments and companies located in various countries, including emerging markets. It may invest up to 25% of its assets in emerging markets generally and up to 7% of its assets in any single emerging market country. The fund is non-diversified. There is no assurance the objectives will be met.

Fixed income investment (bond) funds are subject to interest rate risk; their value will decline as interest rates rise. Fund shares are not guaranteed by the U.S. Government.

Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.
