Description / Objective
The investment seeks capital appreciation. The fund invests mainly in common stock of U.S. and foreign companies. It can invest without limit in foreign securities and can invest in any country, including countries with developing or emerging markets. However, the fund currently emphasizes its investments in developed markets such as the United States, Western European countries and Japan. It does not limit its investments to companies in a particular capitalization range, but primarily invests in mid- and large-cap companies. The fund normally will invest in at least three countries (one of which may be the United States). There is no assurance the objectives will be met. *Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.*
