Description / Objective
 The investment seeks long-term capital appreciation. The fund, using a market capitalization weighted approach, purchases readily marketable equity securities of companies whose principal activities include ownership, management, development, construction, or sale of residential, commercial or industrial real estate. It will principally invest in equity securities of companies in certain real estate investment trusts and companies engaged in residential construction and firms, except partnerships, whose principal business is to develop commercial property.
 There is no assurance the objectives will be met.
Sector funds are subject to risks within their specific sectors because they concentrate their investments in securities of companies within certain industries. Therefore, the price of these securities can be volatile.
The real estate industry is greatly affected by economic downturns that may persist as well as changes in property values, interest rates, taxes, environmental issues and regulatory developments.

The performance quoted represents past performance. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-778-2100.
