**Description / Objective**

The investment seeks to provide long-term capital appreciation. The fund invests mainly in the stocks of small and mid-size companies. These companies tend to be unseasoned but are considered by the fund's advisors to have superior growth potential. Also, these companies often provide little or no dividend income. It uses multiple investment advisors. There is no assurance the objectives will be met. *Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.*
