A Mutual Fund

Second Quarter 2020 Fund Fact Sheet

Key Facts		Description / Objective					
Investment Advisor	Massachusetts Financial Services Company	The investment seeks capital appreciation. The fund normally invests its assets primarily in foreign equity securities, including emerging market equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. The advisor focuses on investing the fund's assets in the stocks of companies that it believes are undervalued compared to their intrinsic value. There is no assurance the objectives will be met. <i>Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.</i>
