Description / Objective

The investment seeks long-term total return. The fund invests primarily in equity securities, principally common and preferred stocks, of small cap companies. Under normal market conditions, it invests at least 80% of its net assets, plus borrowings for investment purposes, in securities of small cap companies. The adviser defines small cap companies as those with market capitalizations that fall within the range of the Russell 2000® Index. The adviser expects to invest in approximately 55 to 70 companies.

There is no assurance the objectives will be met.

Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.
