Description / Objective
The investment seeks capital appreciation. Under normal circumstances, the fund invests at least 80% of its net assets (plus borrowings for investment purposes) in common stocks and other equity securities. It invests predominantly in securities issued by companies located in countries contained in the MSCI ACWI (ex U.S.) Index, which includes issuers from a range of developed and emerging market countries. The fund ordinarily invests in securities of issuers located in at least three countries outside the U.S.
There is no assurance the objectives will be met.
Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.
