DESCRIPTION/OBJECTIVE

The investment seeks long-term capital appreciation. The fund invests at least 75% of its net assets in foreign companies in developed markets (for example, Japan, Canada and the United Kingdom) and in emerging markets (for example, China, India and Brazil). It invests a majority of its net assets in the common stock of small- and mid-sized companies with market capitalizations under \$10 billion at the time of initial investment and (ii) may also invest in companies with market capitalizations above \$10 billion, provided that immediately after that investment a majority of the fund's net assets would be invested in Focus Stocks. There is no assurance the objectives will be met.

Small and mid sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. These risks may result in greater share price volatility.
