DESCRIPTION/OBJECTIVE

The investment seeks high current income. The fund pursues its investment objective by investing primarily in a diversified portfolio of high yield corporate bonds (also known as "junk bonds"), which include debt securities issued by U.S. or foreign businesses (including emerging market debt securities). The Adviser does not limit the fund's investments to securities of a particular maturity range. It may invest in derivative contracts (for example, futures contracts, option contracts and swap contracts) to implement its investment strategies.

There is no assurance the objectives will be met.

Fixed income investment (bond) funds are subject to interest rate risk; their value will decline as interest rates rise. Fund shares are not guaranteed by the U.S. Government. High yield "junk" bonds involve a greater risk of default of payment of principal and interest than higher-rated bonds. Also, these bonds tend to be less liquid than higher-rated securities. Therefore, an investment in the Fund may not be appropriate for short-term investing.
