DESCRIPTION/OBJECTIVE

The investment seeks income and capital growth consistent with reasonable risk. The fund invests approximately 60% of assets in stocks and other equity securities and the remainder in bonds and other debt securities, including lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds), when its outlook is neutral. It invests at least 25% of total assets in fixed-income senior securities (including debt securities and preferred stock). There is no assurance the objectives will be met.

Keep in mind that application of asset allocation and diversification concepts does not ensure a profit or protect against loss in a declining market. **It is possible to lose money by investing in securities.**
