DESCRIPTION/OBJECTIVE

The investment seeks high total return with a secondary objective of principal preservation as the fund approaches its target date and beyond. The fund invests primarily in a combination of Fidelity® domestic equity funds, international equity funds, bond funds, and short-term funds (underlying Fidelity® funds). It allocates assets according to a neutral asset allocation strategy that adjusts over time until it reaches an allocation similar to that of the Fidelity Advisor Freedom® Income Fund. There is no assurance the objectives will be met.

The target date is the approximate date when investors plan to start withdrawing their money. The asset allocation of the target date funds will become more conservative as the target date approaches by lessening your equity exposure and increasing your exposure in fixed income type investments. The stated asset allocation may be subject to change. The principal value of an investment in a target date fund is not guaranteed at any time, including the target date, and there is no guarantee that the funds will provide adequate retirement income. A target date fund should not be selected based solely on age or retirement date. It is possible to lose money by investing in securities, including losses near and following retirement.
