DESCRIPTION/OBJECTIVE

The investment seeks to provide a high level of capital appreciation. The fund invests at least 80% of its net assets in equity securities of companies that are considered to be small companies at the time the fund makes its investment. It invests primarily in the common stocks of companies which the Adviser believes are likely to have rapid growth in revenues and above average rates of earnings growth. The Adviser currently characterizes small capitalization companies for the fund as those with total common stock market values of \$3 billion or less at the time of investment.

There is no assurance the objectives will be met.

Small and mid sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.
