DESCRIPTION/OBJECTIVE

The investment seeks a high level of current income by investing primarily in a diversified portfolio of debt securities which are rated below investment grade or unrated; capital appreciation is a secondary objective. The fund normally invests at least 80% of its assets in bonds, other debt securities, loan assignments and participations (Loans), commitments to purchase loan assignments (Unfunded Commitments) and preferred stocks that are rated below investment grade or unrated. It may invest no more than 30% of its net assets in Loans and Unfunded Commitments. The fund's average weighted maturity ordinarily will range between three and ten years.

There is no assurance the objectives will be met.

Fixed income investment (bond) funds are subject to interest rate risk; their value will decline as interest rates rise. Fund shares are not guaranteed by the U.S. Government. High yield "junk" bonds involve a greater risk of default of payment of principal and interest than higher-rated bonds. Also, these bonds tend to be less liquid than higher-rated securities. Therefore, an investment in the Fund may not be appropriate for short-term investing.
