DESCRIPTION/OBJECTIVE

The investment seeks capital appreciation. The fund normally invests its assets in equity securities. Equity securities include common stocks, equity interests in real estate investment trusts (REITs), and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. MFS focuses on investing in the stocks of companies the adviser believes are undervalued compared to their perceived worth (value companies). While the fund may invest the fund's assets in companies of any size, it primarily invests in companies with small capitalizations. The fund may invest the fund's assets in foreign securities.

There is no assurance the objectives will be met.

Small and mid sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.
