## DESCRIPTION/OBJECTIVE

The investment seeks to provide long-term capital growth. The fund will normally invest at least 80% of its net assets (including any borrowings for investment purposes) in stocks of small companies. The manager defines a small company as one whose market capitalization falls (i) within or below the current range of companies in either the Russell 2000® Index or the S&P SmallCap 600 Index or (ii) below the three-year average maximum market cap of companies in either index as of December 31 of the three preceding years.

There is no assurance the objectives will be met.

*Small and mid sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.*
