DESCRIPTION/OBJECTIVE

The investment seeks long-term capital appreciation. The fund normally invests at least 80% of its investable assets in equity and equity-related securities of medium-sized companies with the potential for above-average growth. The fund's investable assets will be less than its total assets to the extent that it has borrowed money for non-investment purposes, such as to meet anticipated redemptions.

There is no assurance the objectives will be met.

Small and mid sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.
