**DESCRIPTION/OBJECTIVE**

The investment seeks capital appreciation; income is a secondary consideration. The fund invests at least 80% of its net assets in securities of European companies that the investment manager believes are available at market prices less than their value based on certain recognized or objective criteria (intrinsic value). It normally invests in securities from at least five different countries, although, from time to time, it may invest all of its assets in a single country. The fund also may invest up to 20% of its total assets in securities of U.S. issuers and of issuers from the Middle East and the remaining regions of the world, including emerging markets.

There is no assurance the objectives will be met.

*Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.*
