DESCRIPTION/OBJECTIVE

The investment seeks to provide capital appreciation and current income consistent with its current asset allocation. The fund invests in other Vanguard mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2040 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase. There is no assurance the objectives will be met.

The target date is the approximate date when investors plan to start withdrawing their money. The asset allocation of the target date funds will become more conservative as the target date approaches by lessening your equity exposure and increasing your exposure in fixed income type investments. The stated asset allocation may be subject to change. The principal value of an investment in a target date fund is not guaranteed at any time, including the target date, and there is no guarantee that the funds will provide adequate retirement income. A target date fund should not be selected based solely on age or retirement date. It is possible to lose money by investing in securities, including losses near and following retirement.
