DESCRIPTION/OBJECTIVE

The investment seeks long-term capital appreciation. The fund invests at least 80% of its total assets in equity securities of small-capitalization companies, which the managers define as securities of companies with market capitalization within the range of the Russell 2000® Index; and up to 25% of its total assets in equity securities of foreign issuers through ADRs and similar investments.

There is no assurance the objectives will be met.

Small and mid sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.
